DETAILED ACTION

The inventions are distinct, each from the other because of the following reasons:

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 through 24 and 35 through 38 drawn to a device, classified in class 257, subclass 9.
- II. Claims 25 through 30 are drawn to a method or manufacturing, classified in class 438, subclass 14.
- III. Claim 31 and 32 is drawn to a manufacturing plant, classified in class 148, subclass 95.
- IV. Claim 33 and 34 are drawn to a method for maintaining an exposure, classified in class 716, subclass 21.

Inventions Group I, Group II, Group III and IV are related as an exposure system, method for producing a device, production factory and method for maintaining an exposure. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process.

Art Unit: 2812

(MPEP § 806.05(e)). In this case the device in Group II can be made by a different method than that claimed in Group II. Also, the device can be made in a entirely different environment than that claimed in Group III. Furthermore, the device's exposure can be maintained by a different method than that claimed in Group IV.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
